Introducing IBD Bold 30i™

Welcome to the next generation of beverage dispensing.

IBD Bold 30i™

Building on our unmatched legacy of quality and innovation comes our most cutting-edge beverage dispensing solution – the **IBD Bold 30i™**.

With a sleek design, digital touchscreen merchandiser, and Lancer Link™ IoT connectivity, the first dispenser in our IBD Bold series will elevate your customers' beverage dispensing experience to new heights.

Pour **BOLD** or go home.

Unprecedented Versatility

Customers continue to demand more: more options, more variety, more convenience. With the IBD Bold 30i™, you can provide just that. With the flexibility to serve up to 24 different brands (16 chilled and 8 ambient), as well as serve both cubed and chewable ice types (without the need for a kit), you are guaranteed to have more of what your customer is looking for. More offerings, less space.

Eye-Catching Design

The fresh, modern design of the IBD Bold 30i™ will elevate the look and feel of your operation while encouraging customer use and driving sales. A 27" digital merchandiser will put promotions front and center with its high-resolution and crystal-clear display. Connect with your customers through programmable content that will drive engagement and action. The patented Lancer Flow Control (LFCV) technology ensures no flavor or color carryover. Pair that with cast-in cold carbonation and you get unmatched beverage quality in every cup.

Hygienic Protection

With the new environment we find ourselves operating in regarding health and safety, customers are more concerned than ever with hygienic measures put in place by businesses to ensure their safety. With hygienic protection features built into the design of the IBD Bold 30i™, you can reduce risk of contamination from beverage and ice dispensing often caused through frequent, daily use. Now your customers can enjoy peace of mind without the need for additional parts or work on your part.

Pour **BOLD** or go home.
